Sustainability-related disclosures and disclosures on principal adverse impact

Pursuant to Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector, Verb VC is required to disclose the manner in which Sustainability Risks are integrated into the investment decision and the results of the assessment of the likely impacts of Sustainability Risks on the returns.

Sustainability Risks are principally linked to climate-related events resulting from climate change (physical risks) or to the society's response to climate change (transition risks), which may result in unanticipated losses that could affect the Fund's investments and financial condition. Social events (e.g. inequality, inclusiveness, labour relations, investment in human capital, accident prevention, changing customer behavior, etc.) or governance shortcomings (e.g. recurrent significant breach of international agreements, bribery issues, products quality and safety, selling practices, etc.) may also translate into Sustainability Risks.

Verb VC does not actively promote Sustainability Factors and does not maximize portfolio alignment with Sustainability Factors; however, it remains exposed to Sustainability Risks. Such Sustainability Risks are integrated into the investment decision making and risk monitoring to the extent that they represent a potential or actual material risks and/or opportunities to maximizing the long-term risk-adjusted returns.

The impacts following the occurrence of a Sustainability Risk may be numerous and vary depending on the specific risk, region and asset class. In general, where a Sustainability Risk occurs in respect of an asset, there will be a negative impact on, or entire loss of, its value. Such assessment of the likely impact must therefore be conducted for each investment strategy in place.

Verb VC does not consider the adverse impacts of the investment decisions on Sustainability Factors (i) as no sufficient data of satisfactory quality is available to allow

Verb VC to adequately assess the potential adverse impact of the investment decision on Sustainability Factors, (ii) because of a lack of relevant disclosures from target investments and (iii) as there are no adequate methodologies to calculate the potential adverse impact of the investment decision on Sustainability Factors and (iv).

Notwithstanding the above, the investments underlying this financial product do not take into account the EU criteria for environmentally sustainable economic activities which are determined by the Regulation (EU) 2020/852 of the European Parliament and of the Council of 18 June 2020 on the establishment of a framework to facilitate sustainable investment, as amended from time to time.

Anti-Bribery and Corruption Policy

Applicable regulations (not limited to):

- The Bribery Act 2010
- FCA Handbook, Principles for Business 1: A firm must conduct its business with integrity;
- FAC Handbook, Senior Management, Systems and Controls

It is Verb VC's policy to conduct all of our business in an honest and ethical manner. We take a zero tolerance approach to bribery and corruption and are committed to acting professionally, fairly and with integrity in all our business dealings and relationships wherever we operate and we implement and enforce effective systems to counter bribery.

Under no circumstances may an Employee or Associated Person solicit any form of bribe from a third party.

A bribe is defined as a financial or other advantage with the intention of influencing the recipient to carry out a function improperly, or as a reward for having already done so.

Corruption is the misuse of a public office or power for a private gain; or misuse of private power in relation to business outside the realm of government.

Offences under the act:

- Bribing another person
- Being bribed
- Bribing foreign officials
- Failure of commercial organisations to prevent bribery

The penalty for having committed an offence under the Act are potentially up to an unlimited fine and/or imprisonment for up to 10 years.

A company's defence for failing to prevent bribery is having adequate procedures in place. However, if found guilty of committing an offence then the organisation would potentially face an unlimited fine, and any "senior officer" will be guilty of the same offence if he or she has consented to or connived in the commission of the offence. This is a form of secondary liability and is not a separate offence.

If you are unsure whether a fee or service could be construed as a bribe, please contact action@verb.ventures ->
